ABSTRACT:

PURPOSE: To provide the titled compsn. having excellent mechanical strength and moldability at a low mold temp., consisting of a specified polyester amide copolymer, a reinforcing material or a filler, a carboxylate metal salt and a polyalkylene glycol.

CONSTITUTION: 10~140pts.wt. reinforcing material or filler, e.g. talc, 0.05~20pts.wt. Na or K salt of a polymer, e.g. an ethylene/methacrylic acid copolymer, contg. carboxyl groups or Na or K salt of a 7~25C carboxylic acid, e.g. stearic acid, and 0.1~10pts.wt. polyalkylene glycol of the formula III (wherein R1, R1' are each lower alkyl; R2 is a 2~4C alkylene; n is 5 or greater) is blended with 100pts.wt. polyester amide copolymer having an intrinsic viscosity of 0.5~2.0 and composed of 0.05~20wt% polyamide block having 2~40 number-average repeating units of amide unit of formula I (wherein R1, R2 are each H, methyl) and 99.95~80wt% polyester block of formula II (wherein n is 2~4).

ABSTRACTED-PUB-NO: JP59219365A

BASIC-ABSTRACT:

Compsns. comprises 100 pts. wt. of (A) polyesteramide type copolymers having an inherent viscosity being above 0.5 and comprising 0.05-20 wt% of (A-1) polyamide block consisting of the amide unit of formula (I) and having an average continuous repetition number of the amide unit being 2-40 and 99.95-80 wt% of (A-2) polyester block comprising the ester unit of formula (II), 10-140 pts. wt. of (B) reinforcing substances or fillers, 0.05-20 pts. wt. of (C) sodium salts or potassium salts of 7-25C carboxylic acids, or sodium salts or potassium salts of carboxyl gp.-contg. polymers and 0.1-10 pts. wt. of (D) polyalkylene glycols of formula (III). R1, R2 is H or methyl gp.; n is an integer of 2-4; R3, is H or lower alkyl gps.; R4 is 2-4C alkylene gp.; m is an integer of above 5. (A-2) includes pref. polyethylene terephthalate providing the mouldings of high strength and high elasticity. Dicarboxylic acid component of (A-1) contains pref. at least 30 mole% of isophthalic acid and/or orthophthalic acid.

ADVANTAGE - Present resin compsns. show excellent mouldability at a low mould temp. as below 100 deg.C and provide the mouldings having improved dynamic strength.

ABSTRACT

PURPOSE: To provide the titled composition having excellent mechanical strength and moldability at a low mold temperature, consisting of a specified polyester amide copolymer, a reinforcing material or a filler, a carboxylate metal salt and a polyalkylene glycol.

CONSTITUTION: 10-140pts.wt. reinforcing material or filler, e.g. talc, 0.05- 20pts.wt. Na or K salt of a polymer, e.g. an ethylene/methacrylic acid copolymer, containing carboxyl groups or Na or K salt of a 7-25C carboxylic acid, e.g. stearic acid, and 0.1-10pts.wt. polyalkylene glycol of the formula III (wherein R(sub 1), R'(sub 1)' are each lower alkyl; R(sub 2) is a 2-4C alkylene; n is 5 or greater) is blended with 100pts.wt. polyester amide copolymer having an intrinsic viscosity of 0.5- 2.0 and composed of 0.05-20wt% polyamide block having 2-40 number-average repeating units of amide unit of formula I (wherein R(sub 1), R(sub 2) are each H, methyl) and 99.95-80wt% polyester block of formula II (wherein n is 2-4).
